DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Deaton et al (US6048403).

Deaton et al discloses a substrate support ring comprising a band (158, 154) comprising an inner perimeter to surround a periphery of the substrate (Figures 4, 5, 6), a lip (148, 150) extending inwardly from the inner perimeter of the band to support the substrate (Figures 4, 5, 6), wherein the band and lip comprise oxidized silicon carbide (column 4, lines 3-5), a gas supply and exhaust (column 4, lines 18-22), and a radiation source (110).

Allowable Subject Matter

3. Claims 9-19 are allowed.
4. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
